SILVERBACK GELATO

β-Caryophyllene Dominant (.71%)

The Calming Terpene

Limonene present (.46%)

The Uplifting/Euphoric terpene

When selecting a cultivar to pair with Thanksgiving, consideration was given to the anxiety and stress so many feel when attending family events. A bud rich in β-Caryophyllene to help calm the nerves and relieve stress was the primary concern. Additionally, to complement the calmness and encourage lively dinner table conversation significant Limonene was also needed in the terpene profile of the weed. Finally, because you're about to eat the biggest meal of the year, it doesn't hurt that this cultivar gives a lot of users the munchies. These three reasons make Silverback Gelato the perfect accompaniment to family holidays!

JFK

Total THC 18.26%

Total Terpenes 1.81%

Limonene .65% • Ocimene .33%

Michigan's caregiver growers produced legendary cultivars that were rarely available outside the the legacy market. JFK is Southland's co-founder and former caregiver Chris' offering into the pantheon of cultivars representing Michigan's homegrow community. With significant amounts of Limonene, Myrcene, and Beta Caryophyllene along with Linalool and Humalene, JFK's entourage effect delivers for most users, regardless of their previous experience or desired effect. JFK is great midwestern craft weed that smells, tastes and delivers as expected. As your old connect might have said, this is the weed we have been waiting for.

PUNCH CAKE

Total THC 18.72%

Limonene .85% • B-Caryophellene .40% • Linalool .32%

A classic uplifting hybrid, Punch Cake is Limonene, dominant but complimented with almost equal parts B-Caryophyllene and Linalool to add calming anxiety relieving effects along with euphoria. The first smell reveals an intense old fashioned red Hawaiian punch fruit drink aroma that packs a strong punch. The mid-range Total THC percentage creates a lovely body high along with a clear calm high perfect for daytime and night time activities.

GELATO SOUR

Total THC 18.88%

Limonene .44% • Myrcene .34% • B-Caryophyllene .31%

Gelato Sour is a modern hybrid bred to deliver a 60/40 sedating effect, with a huge entourage effect. There are 8 main terpenes, one of which is dominant in over 95% of all cannabis tested. Southland's Gelato Sour has all 8 present in its profile, with 6 of the terps representing .1% or more of the bud. This weed delivers a well-balanced high perfect for chilling, or going out for the evening.

ICE CREAM CAKE

Total THC – 21.06%

Limonene .65% • B-Caryophyllene .57% • Myrcene .35% • Linalool .22% • Humulene .16% • Pinene .11%

An incredibly balanced high-octane hybrid, Ice Cream Cake's terpene profile is the modern definition of the entourage effect. Let by the uplifting Limonene terp, it has significant levels of B-Caryophyllene, Myrcene, Humulene, Linalool and B-Pinene, creating a well-balanced stoned body feeling while allowing the uplifting mental high. This is one great weed for most any occasion.

BANANA PUDDIN

Total THC 20.4%

Limonene .78% • B-Caryophyllene .31% • Linalool .27%

A wonderfully uplifting Limonene dominant cultivar, the Banana Puddin high seems to go on forever. The presence of Linalool and B-Caryophyllene brings stress reduction and calmness to the euphoric benefits of Limonene. This is a wonderful daytime cultivar as well as going great for a night out among crowds.

GREEN RUNTZ

Total THC 17.40%

Total Terpenes 2.99%

Myrcene 1.43% • Terpinolene .67%

Green Runtz is a true expression of clean green craft weed. The terpene content is a rare combination of terpinolene and myrcene. Marrying herbal and fruity, the jar pop on this flower immediately indicates a special treat. At 2.99% terpenes, it's the terpyist weed on the menu and delivers an entourage effect that combines the relaxation and pain-relieving effects of the myrcene with the terpinolene's anxiety relief and cerebral effects. This is one great high!

DOUBLE DÉJÀ VU

Total THC 21.28%

Total Terpenes 2.76%

Myrcene 1.79% • Ocimene .24%

Double Déjà Vu will have you double taking your double take. Making you high as a kite while alert and creative, DDV is an outstanding example of modern cannabis breeding. It expresses the finest attributes of multiple cultivars. Its myrcene dominant high creates a happy, euphoric, relaxing feeling that is complimented by the uplifting effect of the ocimene. Perfect to pair with live music or a night out.

GANJAGARS

Created after the co-founders trip to Colorado, the Ganjagar is a Southland innovation elevating the connoisseur cannabis experience.
